**Accelerator Division, Fermi National Accelerator Laboratory, US**

**\*chou@fnal.gov**

As a first milestone of the CEPC-SPPC study, a Preliminary Conceptual Design Report (Pre-CDR) will be completed shortly. It will be published after an international review scheduled in February, 2015. This talk will introduce the principal contents of this report, including the machine layout and performance, accelerator parameters, beam dynamics, technical systems design, injectors, upgrade from an e+e- collider (the Higgs factory) to an energy frontier pp collider, possible option for ep, eA and heavy ion colliders, conventional facilities and an R&D plan.
