

## **Pre-CDR of the Calorimeter and Muon System of CEPC**

**Tao Hu\***

**Institute of High Energy Physics, CAS**

**On behalf of the CPEC Calor Group**

**\*hut@ihep.ac.cn**

We would to report the preliminary concept design of Calorimeter system of CEPC. The Calorimeter system include electromagnetic calorimeter (ECAL) and hadronic calorimeter (HCAL) will be a extremely fine granularity detector based on Particle Flow Algorithm (PFA). The two options for each system are described. The preliminary concept design of Muon system will also be presented.
